麦斯凯阀门

麦斯凯10多年来致力于耐恶劣 工作环境球阀的设计和 材料方面的研究工作

MSIK works for the design of ball valves under
poor work conditions and the research of materials for over ten years.

COMPANY PROFILE

企业简介

麦斯凯公司拥有一个完整的质量保证系统，以此确保产品符合各种产品标准的规定。麦斯凯全体员工对质量至上的全面认同是产品的最佳保证。麦斯凯公司创立了一个从最初客户询价到最终产品发展的整个过程的一个质量体系。麦斯凯全体员工始终以“高标准、高要求、高品质、高追求”为服务宗旨，全心全意为用户解决问题，满足用户的需求。

麦斯凯拥有超过10年的工程设计经验，且不断进行技术革新。在麦斯凯用户可以最大程度地了解本行业的相关知识、以及工程应用和革新方面的信息。对于客户的特殊要求，麦斯凯的设计人员会提供最佳的解决方案。麦斯凯是一家专业研究、设计、生产在恶劣环境中应用的全金属密封球阀的公司。实际上，在很大程度上，麦斯凯是一个专门按照客户要求定制阀门的公司。麦斯凯的工程设计专家可以分析客户需要，设计出满足客户、能够解决客户严酷苛刻工况问题的阀门产品。麦斯凯10多年的致力于耐恶劣工作环境球阀的设计和材料方面的研究工作，并且广泛应用于炼油、石油、化工、电站、采矿、造纸等行业的重要部位。产品在客户工厂的可靠运行及安全操作，一次次地得到了验证。将继续不断地进行研究和革新，通过改进球体及阀座的表面硬化工艺等来实现麦斯凯过程控制领域的解决方案。

MSIK Company has a perfect quality control system to ensure the products conform to various product standards. MSIK personnel's overall identification with the concept of quality foremost is the best guarantee to product quality. MSIK Company has set up a quality system including the whole process from customer inquiry to development of final products. Holding the service principle of "high standard, high requirement, high quality and high pursuit", MSIK personnel are wholeheartedly solving customer problems and meeting user demands.

With more than ten years of experience in engineering design, MSIK is making continuous technical reform. In MSIK, users will know the information relating to the industrial knowledge, engineering applications and renovations as much as possible. MSIK designers will offer the solutions according to special requirements of customers. MSIK is the company that specializes in researching, designing and producing full metal seal ball valves applied under severe service conditions. Actually, MSIK is a company mainly specialized in providing customized valves according to customer requirements. The engineering design experts of MSIK are capable of analyzing customer demands and designing valve products that meet customer requirements for severe service conditions. For over ten years, MSIK has been devoted to the design of ball valves resistant to severe working environments and the research of materials, and the products are applied in important parts in such industries as oil refining, petroleum, chemical industry, power station, mining, pulp & paper, etc. The reliable running and safe operation of products at customer factories have been verified again and again. We will continue to make research and reform and realize solutions in the process control field through improving the surface hardening technology for the ball and seat.

PRODUCTION EQUIPMENT

生产装备

CUTTING- EDGE

MACHINING EQUIPMENT ACCOMPLISHES
EXCELLENT PRODUCT QUALITY

高尖端的加工设备造就优良的产品品质

为了解决超硬球体的加工问题，麦斯凯公司购置了大型高精度数控磨球中心，加工出的球体直径可达1080mm，圆度达到0.01以下，完全可以满足目前催化剂耐磨球阀的使用要求。截止目前麦斯凯公司有数控磨球机3台；精磨球体的外径直径可达30~1080mm，其它高精度加工设备40多台套。

In order to solve the machining problem of super-hard balls, MSIK Company has purchased large-sized high precision CNC ball grinding centers, with the ball after machining having a diameter of up to 1080mm and a roundness of below 0.01, which can fully meet the service requirements of catalyst anti-wear ball valves. Up to now, MSIK Company has three CNC ball grinding machines with the outside diameter of the ball after precision grinding within the range of 30~1080mm, as well as other more than 40 sets of high precision machining equipment.

TESTING EQUIPMENT

检测设备

MSIK®
麦斯凯阀门

从毛坯铸件到最终产品，麦斯凯拥有先进的检验和测试设备进行质量控制。所有铸件都按照相关的规格进行清晰的外观和尺寸检验；严格的工序检验贯穿整个生产过程；每个阀门都按照客户的要求或国际标准 准经过严格的检验，并在装运前进行最终检测。麦斯凯将努力实现阀门零缺陷。总之，我们拥有绝对的品质控制能力，从产品的设计开发、材料采购、生产制造直到包装出货，都遵循严格的质量管理制度，从而确保产品始终如一的高品质。

MSIK adopts the advanced inspection and testing facilities to carry out quality control of casting blanks and final products. All castings are subject to precise appearance and size inspections according to relevant standards. The strict procedure inspection is implemented throughout the whole production process. Each valve undergoes strict inspection according to customer requirements or international standards, and is subject to final inspection before shipment. MSIK will strive to realize zero defect of valves. In short, we have the excellent quality control ability. From design and development, material purchasing, production till packaging and delivery, we strictly follow the quality control system, ensuring the consistently high quality of products.
